Business Problem & Objectives

Cyclistic's Challenge

Casual riders generate revenue through single-use rides, but annual members provide more predictable and sustainable long-term value.

The marketing team wants to understand how rider behavior differs between casual riders and members to increase membership adoption.

Project Goal

Identify behavioral differences between casual riders and annual members and develop data-driven strategies that convert casual riders into annual memberships.

Key Questions

How do casual riders and members use Cyclistic differently?

When do riders use the service most often?

Which bike types are preferred?

What opportunities exist for conversion?

Success Metric

Increase annual membership adoption through targeted marketing strategies informed by rider behavior data.

EXECUTIVE SUMMARY

Key Findings, Recommendation & Growth Opportunity

RIDE VOLUME

Casual riders use Cyclistic more frequently

528

Casual Rides

472

Member Rides

53% of total rides are from casual riders

RIDE DURATION

Casual riders take longer trips

28.0

min

Casual Riders

20.5

min

Members

+37%

Longer duration for casual rides

ELECTRIC BIKE USAGE

Electric bikes are the most popular rideable type

827

Electric Bike Rides

82.7%

of all rides

Electric bikes dominate usage across both groups

RECOMMENDATION

Convert high-frequency casual riders into annual members through value-based messaging and electric bike-focused promotions.

Lower monthly costs

Unlimited rides

Reduced unlock fees

Electric bike access

Weekend exploration

GROWTH OPPORTUNITY

10–15%

Conversion Target

Potential Benefits

- ✓ Higher recurring revenue
- ✓ Improved customer retention
- ✓ More predictable demand

INSIGHT #1: CASUAL RIDERS GENERATE MORE TRIPS

KEY TAKEAWAY

- ✓ Casual Riders: **528 rides (53%)**
- ✓ Members: **472 rides (47%)**
- ✓ Casual riders generated a slight majority of total rides
- ✓ Large pool of active non-members presents conversion opportunities

Casual riders already represent the majority of usage, highlighting a **strong opportunity to convert active non-members.**

INSIGHT #2: CASUAL RIDERS TAKE LONGER TRIPS

Average Ride Duration (Minutes)

KEY TAKEAWAY

Casual Riders:
28.0 min average ride

Members:
20.5 min average ride

Casual rides are **37% longer** than member rides

Suggests **recreational** and **leisure-oriented** usage patterns

Casual riders take **37% longer** trips on average, indicating more leisure and exploration-oriented usage.

INSIGHT #3: ELECTRIC BIKES DRIVE USAGE

Rideable Type Preferences by Member Type

KEY TAKEAWAY

827 of 1,000 rides (83%)
were electric-bike rides.

Casual Riders:
416 e-bike rides

Members:
411 e-bike rides

Strong preference for
electric bikes across
both rider groups.

83% of all rides were taken on **electric bikes**,
indicating strong demand for convenient, low-effort transportation.

INSIGHT #4: WEEKEND RIDERSHIP PEAKS AMONG CASUAL RIDERS

Average Daily Rides by Rider Type

Casual Member

KEY TAKEAWAY

- ✓ Casual riders peak **Friday-Sunday**.
- ✓ Highest usage on **Saturday**.
- ✓ Weekend demand is **significantly higher** than weekdays.

Casual riders are most active on weekends, with the **highest usage on Saturday**. This highlights a strong opportunity to promote weekend-focused membership benefits and campaigns.

FINAL RECOMMENDATIONS & NEXT STEPS

This analysis highlights clear opportunities to convert high-frequency casual riders into loyal **Divvy** members.

KEY FINDING	RECOMMENDED ACTION
 Casual riders account for 53% of rides.	Target casual riders with membership campaigns. Focus on riders who already use Divvy the most.
 Casual rides are 37% longer on average.	Position memberships around leisure and frequent use. Highlight the value for longer, more flexible rides.
 83% of rides are e-bike rides.	Promote unlimited e-bike access and reduced unlock fees. Emphasize the benefit riders value most.
 Casual usage peaks on Friday–Sunday.	Launch weekend-focused membership promotions. Run time-sensitive offers when riders are most active.

FINAL RECOMMENDATION

Cyclistic should focus marketing efforts on high-frequency casual riders by emphasizing cost savings, e-bike access, and weekend-focused membership promotions. **These strategies align with observed rider behavior and present the strongest opportunity to increase annual membership adoption.**

Recommended Campaigns Based On Rider Insights

Example marketing concepts designed to convert frequent casual riders into annual Divvy members.

Weekend Conversion Campaign

MAKE EVERY WEEKEND A MEMBER WEEKEND

Unlock unlimited rides and exclusive member benefits all season long.

Start Riding

A man with curly hair, wearing a red and white striped shirt and blue jeans, is riding a grey Divvy bike on a paved path. In the background, another person is riding a bike, and there are boats and a city skyline across the water.

E-Bike Benefits Campaign

MORE E-BIKES. FEWER FEES.

Members enjoy reduced unlock costs and unlimited access to the bikes riders love most.

A man with curly hair, wearing a plaid shirt, is riding a grey Divvy e-bike. He is smiling and looking down at the bike. The bike has a basket on the handlebars and the Divvy logo on the frame. A blue button with the text "Unlock Now" is at the bottom.

Unlock Now

Cost Savings Campaign

MORE RIDES. FEWER FEES.

Frequent riders can save more with an annual Divvy membership.

A woman with long dark hair, wearing a black jacket and leggings, is riding a grey Divvy bike on a paved path. In the background, there is a city skyline across a body of water. A blue button with the text "START SAVING" is at the bottom.

START SAVING

POTENTIAL BUSINESS IMPACT

Expected outcomes from implementing the recommended membership strategy

10–15% CONVERSION OPPORTUNITY

Convert active casual riders into annual members through targeted promotions and value-based messaging.

RECURRING REVENUE GROWTH

Membership subscriptions create predictable revenue compared to one-time ride purchases.

IMPROVED RIDER RETENTION

Members are more likely to ride consistently and remain engaged throughout the year.

Even a modest conversion of casual riders could significantly **increase long-term revenue** while **strengthening customer loyalty**.

FUTURE QUESTIONS & OPPORTUNITIES

Key areas for further exploration to strengthen membership growth strategies.

1 MEMBERSHIP CONVERSION DRIVERS

QUESTION:

What rider characteristics best predict membership conversion?

OPPORTUNITY:

Identify high-value casual riders most likely to become annual members and prioritize marketing spend toward those segments.

2 WEATHER & SEASONALITY

QUESTION:

How do weather conditions influence casual versus member ridership?

OPPORTUNITY:

Develop seasonal campaigns and promotions that align with rider behavior during different weather patterns.

3 MARKETING CHANNEL EFFECTIVENESS

QUESTION:

Which marketing channels drive the highest membership sign-ups?

OPPORTUNITY:

Optimize budget allocation across social media, email, influencer partnerships, and local advertising.

4 LONG-TERM RETENTION

QUESTION:

What is the retention rate of riders who convert to annual memberships?

OPPORTUNITY:

Measure the long-term value of converted riders and improve retention strategies after sign-up.

KEY TAKEAWAY

Future analysis should focus on understanding rider conversion behavior, marketing effectiveness, and long-term membership value to maximize growth opportunities.

FUTURE ANALYSIS & INSPIRATIONS

Opportunities for deeper analysis and cross-functional collaboration to unlock long-term growth.

1. EXPAND TIMEFRAME ANALYSIS

- Analyze a full 12-month+ dataset to identify seasonal trends and long-term ridership patterns.
- Understand how holidays, weather shifts, and events impact casual vs. member behavior.

2. PREDICTIVE MODELING FOR CONVERSION

- Build predictive models to identify casual riders most likely to convert.
- Incorporate variables such as ride frequency, trip duration, bike type, time of day, and weekends.

3. MARKETING CAMPAIGN TESTING & MEASUREMENT

- A/B test different messages, offers, and creative across multiple channels.
- Track performance by channel to identify the highest converting acquisition sources.

4. OPERATIONAL COLLABORATION

- Partner with Operations to analyze e-bike availability and station capacity.
- Identify high-demand areas and times to improve bike distribution and customer experience.

5. ADVANCED DASHBOARDS & MONITORING

- Build real-time dashboards to monitor key KPIs (rides, conversions, retention, revenue).
- Enable data-driven decision making and faster response to opportunities.

THE BIG PICTURE

By combining deeper data analysis with cross-functional collaboration, Cyclistic can better understand rider behavior, deliver more relevant experiences, and drive sustainable membership growth.

THANK YOU

We appreciate your time and consideration.

Together, let's keep more riders moving
toward a more connected city.
